

Ice Machine Treatment & Odor Abatement System

- Fully automatic
- Easy to use and install
- No costly and complicated chemicals
- Leaves no residue / operates unattended
- Low power consumption, 110 or 220 volt
- Very low maintenance
- Two years continuous operation average photohydroionization[®] cell life
- No tools required for cell replacement

Commercial ice machines are prone to microbial contamination, and if not cleaned well and regularly, can cause the spread of harmful germs to customers, patrons and employees. Microbial growth in ice machines is a common problem and can cause a biofilm or slime buildup. Pathogens that have been found in contaminated ice include Listeria, Salmonella, E.Coli, and B. Cereus. The RGF IMSB is your ideal solution to keep ice machine heads and bins clean and reduce the risk of microbial contamination.

THE RGF IMSB SYSTEM OF LOW COST ADVANCED OXIDATION PRODUCTION IS DESIGNED TO PROVIDE COMMERCIAL AIRBORNE BACTERIA AND ODOR DESTRUCTION

The Physics of RGF's Proprietary Photohydroionization®

A high intensity UV light targeted on a hydrated Quad-Metallic target creates safe low level Hydroperoxides, SuperOxide Ions, Hydroxyl Radicals, and Hydroxides. All are very aggressive friendly gaseous oxidizers. By friendly we mean oxidizers that revert back to oxygen and hydrogen after they oxidize the organics, bacteria, odor or gases.

RGF Photohydroionization® Cell

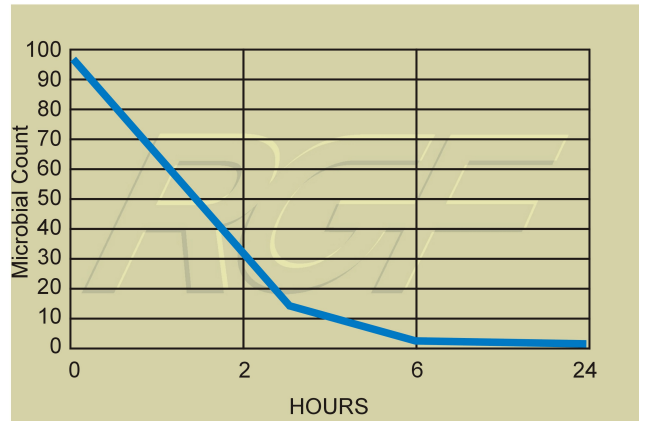

Installation kit includes

- 25' of additional hose
- Five (5) 3/4" grommets
- One (1) wall hose bracket
- Two (2) hose clamps

Bacteria reduction

Specifications

MODEL	IMSB-GA
VOLTAGE	110V 60 HZ 1 AMPS 14 WATTS
WEIGHT	10 LBS.
MATERIAL	STAINLESS STEEL
DIMENSIONS	18" x 4" x 4"
FINISH	BRUSHED STAINLESS STEEL
CONTROLS	INDICATOR LIGHT / ON OFF SWITCH
FAN VOLUME	45 CFM
REPLACEMENT CELL	PHIC-9A
